Domestic Electrician Business Builder

The flexible training course to start your new career

Electrical
Training Services
Connaught Compliance

Is it time for a new start?

The Domestic Electrician Business Builder course is aimed at individuals who are seeking a route into the electrical industry but may have missed an apprenticeship opportunity or be unable to commit to a long term college training course.

Why choose the electrical industry?

The skills shortage within the electrical industry is well documented. The Construction Industry Training Board estimates that there are over 37,000 vacancies within the electrical industry. This is a great career offering flexibility and fantastic earning opportunities.

Our Partners....

City & Guilds are a nationally recognised awarding body. They offer qualifications to students in the electrical industry that are valued by employers and will equip them to fulfil their career ambitions. The flexible seven week domestic electrician business builder course is accredited by City & Guilds.

ELECSA provides inspection, assessment and certification services to contractors working with electrical installations in private dwellings. It enables contractors to self certify domestic electrical work under Part P of the building regulations. Connaught will work with ELECSA to help students on the course achieve Part P Accreditation.

Rotherham and Barnsley Chamber are the largest Chamber in Yorkshire. They will help all students hoping to set up their own business to compete, prosper and grow.

We can provide everything you need to turn on your electrical career

The Basics **Week 1**

Basic Electrical Training (5 Days)

The course contains theory and practical sessions covering essential foundation level principles that form the basis for any involvement with electrical systems.

Topics Covered Include:

- Safe isolation of electrical circuits
- Safe working practices
- Electrical test instrumentation
- Electrical diagrams
- Cable and wiring systems

Gain valuable practical experience and confidence during your training

Get 'Hands On' **Week 2 – 5**

Domestic Electrician Workshop (20 Days)

This course aims to train students in the principles and practices of electrical installation work in a domestic environment. Students entering this style of course learn best from taking a practical approach.

- Course content is tailored for work in domestic installations
- Our fully equipped practical workshop allows in-depth technical training
- Candidates will have completed several complicated house wiring tasks such as lighting circuits, power circuits, fixed equipment circuits, fuse board changes and a variety of wiring and bonding applications in kitchens and bathrooms

Qualifications Achieved

EAL Level 2 Domestic Installer Scheme Qualification City & Guilds 2382-10
17th Edition Wiring Regulations.

Tailor make a training package to suit your exact needs

Advanced Technical Qualifications **Week 6**

City & Guilds 2392-10 Fundamental Inspection, Testing and Initial Verification of Electrical Installations (5 Days)

This course is an ideal next step from the four week domestic electrician workshop module. This new qualification is designed to the requirements of the 17th Edition Wiring Regulations (BS7671:2008) and is restricted to initial verification processes only. The full qualification is achieved following successful completion of both a theory and practical assessment.

Topics Covered Include:

- Requirements of the Electricity at Work Regulations
- Visual inspection of new work
- Completion of a Domestic Electrical Installation
- Certificate, Minor Electrical Installation
- Works Certificate, Schedule of Inspection and a Schedule of Test Results
- Testing techniques

Qualification Achieved

City & Guilds 2392-10 Fundamental Inspection, Testing and Initial Verification of Electrical Installations

We can make starting your business so much easier

Build Your Business **Week 7**

Business Development Module (5 Days)

Students who have reached this stage of the training programme may now be considering starting their own business and at Connaught we appreciate how difficult and challenging this can be.

This module aims to provide students with everything they need to set up a successful business and take the stress away. The unit will focus on five key topics:

- Health and safety
- Business plan and process
- Sales and marketing
- Finance, planning for profit
- Customer service

Connaught have set up a partnership with Rotherham and Barnsley Chamber to deliver this course. Students will benefit from a range of speakers including a qualified accountant and a member of the Institute of Marketing.
